

ILRS ASC Summary

SC Chairs: Erricos C. Pavlis and Cinzia Luceri

- Major topics were the CoM correction model update and systematic error monitoring PP
- The Station Systematic Error Monitoring PP completed the first phase with results from SIX ACs agreeing within the error of the estimates (the only remaining AC to contribute are ESA & **GRGS**...)
- PP for low-degree harmonic estimation and the incorporation of LARES in the operational data product is next in line
- PP for observational-level modeling of loading corrections for stations and corresponding gravitational corrections in orbit (operational product) [summer 2018???]
- Special Issue on Laser Ranging in the Journal of Geodesy
